## Built-In Frame Support System 3L/6L

Water saving tank: 3/6L Can be adjusted for 6/9L.  
 2 operating plates available (white and chromed) giving easy access to the tank.  
 Capable of withstanding a static load of 400kg.  
 System includes: metal framework + cistern complete with flushing mechanism + all necessary water and soil connecting piped to suit all installation requirements.

Height: 1120-1290mm  
 Width: 460mm  
 Depth: 165-245mm

53000001 In-wall frame system  
 5902001 White operating plate  
 59020101 Chrome operating plate

## Sololift+ (Waste Pumping Solutions)

As the demand for water, wastewater and sewage removal continues to increase, Grundfos Pumps, the UK leader in pumps and pumping systems for domestic building services, have decided to extend their range of ready-to-install domestic wastewater pump systems.

### DISCREET COMPACT DESIGN

A great deal of attention has been paid to the design of the new Grundfos Sololift+ units. They are compact and very stylish. "Homeowners shouldn't have to compromise on style in order to get the simplest solution for their needs" stated Mike Robinson, Director of Sales for Grundfos Domestic Building Services; "The Sololift+ units are designed to blend seamlessly into any interior. Of course, the design is not all about great looks," he added, "the compact design also means that they are easy to install even where space is restricted."

The six Sololift+ models are available.  
 Sololift+ WC for a single WC  
 Sololift+ WC-1 for WC and sink  
 Sololift+ WC-3 for WC, sink, bidet and shower or bath  
 Sololift+ C-3 for a washing machine and sink  
 Sololift+ CWC-3 ideal for use with a wall-hung toilet; sink and shower or bath  
 Sololift+ D-3 for use with a shower and sink

WC= can connect to toilet C=compact D=douche(shower)  
 1=1additional inlet 3=3additional inlets

## Concealed Cisterns

### Dual Flush Concealed Cisterns Bottom Entry

*50mm Optional Dual Flush button. This dual flush button, which has been saving water in the UK since 1998 in its standard 40mm version, is now available with a 50mm optional collar to give that little extra!*  
*WRAS approved flexible inlet hose complete with inline isolating valve now supplied as standard.*  
*Cut away cistern designed to enable easier access and installation in the smallest units (500x200)*  
*Improved flexible flush pipe.*

51080001      Dual Bottom Entry

### Side Entry

*50mm Optional Dual Flush button. This dual flush button, which has been saving water in the UK since 1998 in its standard 40mm version, is now available with a 50mm optional collar to give that little extra!*  
*WRAS approved flexible inlet hose complete with inline isolating valve now supplied as standard.*  
*Cut away cistern designed to enable easier access and installation in the smallest units.*  
*WRAS side entry ball valve Torbeck.*

51080101      Dual Side Entry

### Single Flush Concealed Cisterns Side Entry

*Single Flush*  
*Chrome single flush button*  
*Cable operated (stainless steel)*  
*Rigid flush pipe*  
*1 WRAS side entry ball valve Torbeck*  
*Cut away cistern designed to enable easier access and installation in the smallest units.*

51090001      Single Side Entry

## Aqua Grade Wet Room

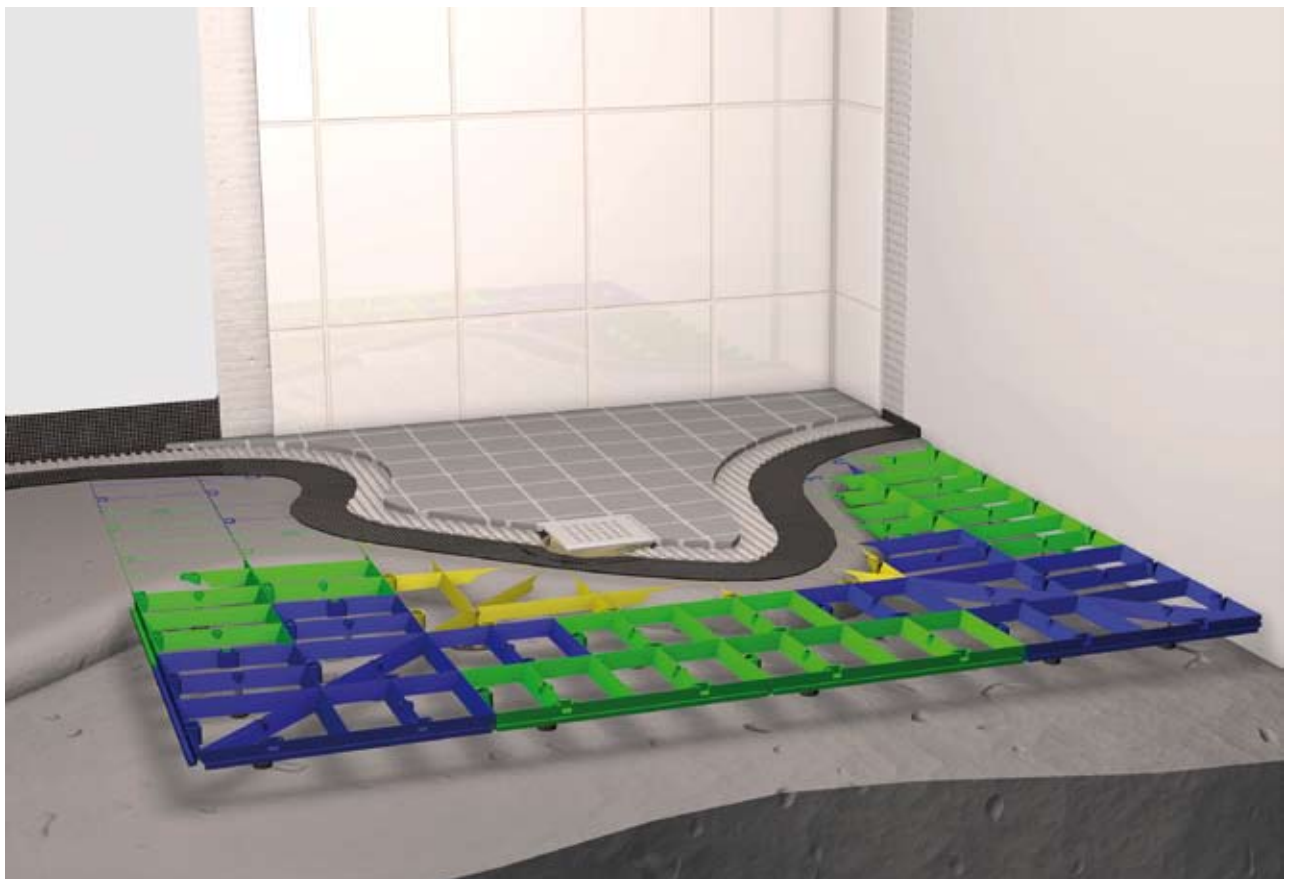

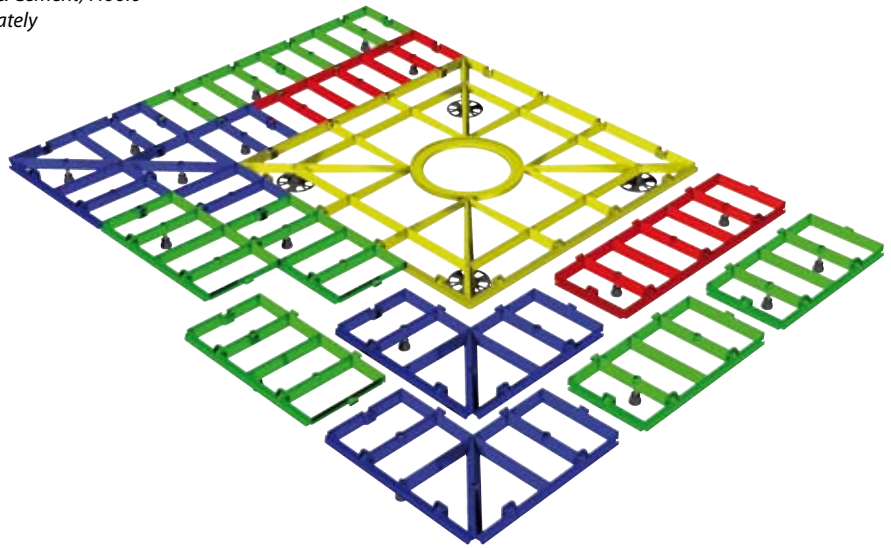

Creating a consistent gradient in a screeded concrete floor for a wet room shower can be difficult and time consuming task that requires a great deal of skill to get just right.

The new Aqua-Grade is the latest addition to the wet room shower range and is designed to produce the perfect drainage gradient with ease.

The unique patented design allows graded floors to be installed at the same time as the main floor screed giving huge time saving benefits.

Aqu-Grade provides a controlled gradient to work to, by simply filling the matrix with the sceed then trowelling over the profile - simple as that! Once the mix has set of fully dried, the top surface can be tiled or overlaid with waterproof vinyl flooring.

Perfect Gradients every time  
Screed Profile with Integral 1:40 Gradient  
Modular Construction, Formed from Colour Coded Sections  
Variable Size Options  
Time Saving  
Gives Consistent Results  
Compatible with underfloor Heating Systems  
Designed for Use in Concrete (Sand & Cement) Floors  
Additional Sections Available Separately  
Suitable for Insulated Floors

## Aqua Dec Wet Room

*The Aqua-Dec is a complete system that has been designed to allow the simple and cost effective creation of wet room shower.*

*We have effectively addressed the three main issues encountered when creating a wet room which are gradient, drainage and waterproofing.*

- Durable, extremely strong and simple to install*
- Suits all types of floor construction*
- Only 22mm in depth, with 17mm preformed gradient*
- Can be trimmed and reversed depending on size*
- Saves creating manual gradients*
- Adjustable gully for varying tile thickness*
- Self adhesive membrane*
- Drain positions designed to avoid joists*
- Available in many sizes*

## RAK Ceramic Tiles

*RAK Ceramics is now one of the ultimate ceramic multinationals of the world. The vision of the founders backed by solid determination has created a successful ceramic tile and sanitaryware manufacturing company that betters world standards for quality, beauty and affordability. What first started production in 1991 has over the past decade progressed with giant strides to be a world class organisation.*

*For further information and brochures please contact our sales office.*
